PROFESSIONAL SUMMARY

MBA graduate (Finance & HR, CGPA: 9.18) with hands-on project experience in Python-based data analysis and web scraping, MySQL database design, and Power BI dashboard development. Built end-to-end projects covering real-time stock market analysis, a normalized employee management system with advanced SQL, and interactive BI dashboards. Proficient in EDA, statistical testing, and visual storytelling. Seeking an entry-level Data Analyst role in a data-driven environment.

TECHNICAL SKILLS

Data Analytics: Advanced Excel (Pivot Tables, VLOOKUP, Data Validation), SQL, Data Cleaning, MIS Reporting, KPI Tracking

Business Intelligence: Power BI (DAX Measures, KPI Cards, Slicers, Interactive Dashboards, Drill-down), Performance Reporting

Database: MySQL — Schema Design, Joins, Subqueries, Window Functions (RANK, ROW_NUMBER, LAG, DENSE_RANK), Views, Stored Procedures

Programming: Python (Pandas, Matplotlib, Seaborn, Selenium, SciPy) | EDA | Statistical Testing (ANOVA)

KEY PROJECTS

Stock Market Analysis via Web Scraping | Python · Selenium · Pandas · Seaborn · SciPy | [LINK](#)

- Scraped 500+ real-time stock records from 35 pages using Selenium; built and cleaned an 8-column dataset from scratch with no pre-existing data source.
- Performed EDA (uni-variate, bi-variate, multivariate); classified stocks into Large/Mid/Small Cap — found ~60% of Groww-listed stocks fall in the Small Cap category.
- Applied one-way ANOVA (SciPy) across all 35 page groups — confirmed statistically significant market cap difference ($p < 0.05$), validating Groww's stock ranking logic.

Employee Management System | MySQL · Window Functions · View · Stored Procedure | [LINK](#)

- Designed a normalized 6-table relational database (Employee, Payroll, Leaves, Salary, Qualifications, Department) with PK/FK constraints and ON DELETE/UPDATE rules.
- Wrote 30+ queries covering salary comparison, leave patterns, payroll trends; implemented RANK(), ROW_NUMBER(), LAG(), DENSE_RANK() window functions for advanced analytics.
- Built a monthly_payroll_summary VIEW and GetEmployeeDetails stored procedure — demonstrates production-level SQL design beyond basic querying.

Adidas Sales Performance Dashboard | Power BI · DAX · Excel | [LINK](#)

- Built an interactive Power BI dashboard analyzing \$899.9M Adidas US sales across regions, retailers, product categories and sales methods using KPI cards, DAX measures and slicers.
- Identified West region as top performer (\$269.9M), In-store as dominant sales channel (\$357M), and West Gear & Foot Locker as highest profit retailers.
- Enabled dynamic cross-filtering across all visuals so KPI cards and charts update in real time based on slicer selection.

Telangana Weather Analysis Dashboard | Power BI · DAX · Excel | [LINK](#)

- Designed a 4-page interactive dashboard analyzing Telangana district-wise weather data (2021–2024) covering rainfall, temperature, wind speed and humidity patterns.
- Key findings: July records highest rainfall (0.83M mm), monsoon contributes majority of annual rainfall, April–May are hottest months (Avg Max ~40°C).
- Implemented District, Year and Season slicers enabling dynamic drill-down across all 33 Telangana districts.

EDUCATION & TRAINING

Master of Business Administration — Finance & HR 2023 – 2025

Annamacharya Institute of Technology & Sciences (Autonomous) | CGPA: 9.18

Bachelor of Commerce — Computer Applications 2020 – 2023

Sri Vaishnavi Degree College | 8.40

Data Analytics Training — Innomatics Research Labs, Bengaluru Sep 2025 – Jan 2026

Coursework: Power BI, SQL, Python (EDA), MIS Reporting, Data Cleaning, Business Intelligence

CERTIFICATIONS

- GenAI Powered Data Analytics Job Simulation — Tata / Forage (Jan 2026)
- Exploratory Data Analysis Certificate — Innomatics Research Labs
- Data Analytics Training Completion Certificate — Innomatics Research Labs
